

Michelle Han

Clarksville, MD | mhan10242019@gmail.com | 443-535-3782

A driven Computer Science major seeking an engaging internship opportunity to advance programming skills, contribute to projects and gain experience in a collaborative environment.

EDUCATION

University of Maryland - College Park
B.S. in Computer Science

Expected 2025

SKILLS

Coding

- Java, C#, Python, SQL, Ocaml, Ruby, Kotlin, Swift, Haskell, XML, R, C/C++, HTML/CSS

IDEs & Software

- Eclipse, Visual Studio, Jupyter Notebook, Azure Data Studio, Android Studio, XCode, Docker

PROJECTS

Infor Developer Assistant | Language: Python

- Fine-tuned T5-small Transformer model that takes a written tutorial for an InforOS application and evaluates the tone and word choices to provide feedback for improving the written quality.
- Developed web-scraping functions that will process and format text from Infor's Developer Portal into JSON strings to be used as training and testing data.
- Utilized Python libraries, such as Transformers, BeautifulSoup, Datasets, Pyarrow, and TensorFlow.

Relational Database | Language: Java, SQL

- Designed and developed a web application that converts CSV files to SQL insert statements to populate a database. It can also populate any database table with a user-specified number of rows. The project allows division of work between UI and backend developers and performance testing of projects.
- Used the Struts2 framework, Spring JdbcTemplate, JQuery, Gradle, Git, SQLServer, Azure Data Studio, Eclipse, Tomcat.

Grapple Game | Language: C#

- Key member in a team of five to develop a dynamic puzzle platformer game that showcased our collective expertise in game design, C#'s Unity Engine and TMPro libraries, and basic modeling using Unity. Overcame challenges, like optimizing game mechanics, ensuring seamless integration of code and graphics, and fine-tuning player interactions.

EXPERIENCE

Development Intern

May - August 2024

Infor

- Authored comprehensive written tutorials accompanying YouTube demonstrations on utilizing InforOS applications.
- Developed an AI model to resolve content consistency issues on Infor's Developer Portal, ensuring uniformity across all published materials.

Cybersecurity Research Intern

2019-2020

University of Maryland - Baltimore County

- Collaborated on in-depth research into user-session characteristics for anomaly detection, analyzing vulnerability scanners and investigating potential malicious patterns.
